

Say No to Egnedol's Experimental Waste and Wood Gasification Plant in Milford Haven

Egnedol has applied for planning permission to build a large waste and wood gasification plant at Blackbridge, Milford Haven. Residents have until 2nd February to object to the proposal.

The plant would:

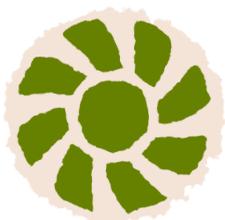

- **Use a technology which no company has ever made to work in the UK - so it's unlikely to deliver the promised jobs and benefits;**
- **Use a technology associated with significant risks of explosion and higher than planned toxic air emissions;**
- **Possibly divert 240,000 tonnes of waste that could be recycled—at least Egnedol provides no evidence that this won't happen.**

What you can do to help stop Egnedol's plans

- ◆ Go to biofuelwatch.org.uk/2017/egnedol-gasifier-objection/ to object to the application.
- ◆ Tell your Councillors and AMs about your concerns.
- ◆ Spread the word and contact biofuelwatch@gmail.com if you want to do more.
